

TWG is an industry leader in the design, engineering & manufacturing of industry-specific winches, hoists, gear drives and monitoring electronics for energy, infrastructure and recovery markets worldwide. We currently have a career opportunity for a **Senior Buyer** to join the TWG team supporting both our LANTEC and PullMaster brands. This role is responsible for maintaining a continuous supply of best value products and services, while applying lean principles to maximize our inventory flow.

### **Responsibilities include:**

- Analyze MRP requirements and determine appropriate supply strategy to ensure timeliness of manufacturing supply
- Ensure on-time materials delivery via internal & external follow-up and expediting as required
- Maintain accuracy of information in our Visual Manufacturing database
- Identify supply shortfall risks and execute mitigation strategies to minimize interruptions
- Resolve supply, pricing, service, and quality issues where applicable
- Proactively communicate potential issues and interruptions in supply
- Work in a team environment to optimize supplier quality, on-time delivery, lead time and cost
- Manage purchase order actions (reschedules / cancelations / expedites / confirmations)
- Manage non-conforming material, receiving discrepancies, and pricing issues.

### **Qualifications:**

- University graduation or an operations management diploma
- PMAC certification and/or APICS designation is an asset
- Minimum 5 years experience in material procurement in a manufacturing environment
- Proficiency with MRP/ERP systems
- Familiarity with transportation, customs and NAFTA issues
- Understanding of lean manufacturing principles
- Strong organization skills with ability to manage competing priorities

The successful candidate will possess excellent communication and time management skills, as well as a sharp mind. He or she will be detail oriented, a capable problem solver, and thrive under pressure. Experience in equipment manufacturing, including the purchase of outside machining and fabrication services, forgings, castings, bearings, and other industrial products would be an asset.
