

A well established manufacturing company seeks a highly analytical and results oriented individual for the position of **PRODUCTION SCHEDULER / INVENTORY CONTROLLER**

The successful candidate is expected to have at least two years of relevant experience in computer based Inventory Control and Shop Floor Scheduling and preferably knowledgeable in MRP II / ERP systems. He must be quite adept with computerized Production Control systems with exceptional inter-personal skills and a high sense of urgency. A professional certification in Planning or Operations will certainly be an advantage.

The company offers a very competitive compensation depending on experience and qualifications. It is an equal opportunity employer and provides a comprehensive benefits package that includes medical, dental and extended health care. It also has an excellent incentive program in place for all employees.

This is an urgent requirement. Please fax, e-mail or send your resume to:
